

Hayes Named Chief Information Officer at National Bank

National Bank is pleased to announce the promotion of Larry Hayes to Chief Information Officer/Senior Vice President of Information Technology.

"Larry has guided our transition through a revolution in banking technology," said James G. Rakes, Chairman, President and CEO of National Bank. "From our first mainframe computer thirty years ago to today's complex networks, Larry's technical expertise and customer focus have been crucial to the success of our organization."

Hayes began his career at National Bank in 1979 as a Data Processing Manager Trainee. Since then he has served as the bank's Data Processing Manager, Assistant Vice President of Data Processing, and Vice President of Management Information Systems. Hayes was named Senior Vice President of Information Technology in 2005, a role he will continue to fulfill in addition to his Chief Information Officer duties.

Hayes is a graduate of the Atlanta Area Technical College in Atlanta, Georgia, and is a former member of the Virginia Community Bankers Association Technology Committee where he served as Vice-Chairman. He currently resides in Radford.

National Bank, founded in Blacksburg in 1891, operates 25 offices throughout Southwest Virginia. The bank is a subsidiary of National Bankshares, Inc., a Blacksburg-based financial holding company with over \$982 million in assets. National Bankshares, Inc. also operates National Bankshares Financial Services, Inc., which does business as National Bankshares Insurance Services and National Bankshares Investment Services.
